PROFESSIONAL SUMMARY

Curious, detail-oriented Computer Science & Engineering student who builds fast, scalable full-stack web applications. Strong in React/Next.js, Node.js, FastAPI and MongoDB/PostgreSQL, with a focus on performance, clean API design and polished interfaces. Uses AI tools (Copilot, Cursor, ChatGPT) to ship faster while understanding every line. Seeking internship, freelance and collaboration opportunities.

EDUCATION

B.Sc. in Computer Science & Engineering — Ongoing
City University, Bangladesh

Coursework: Data Structures & Algorithms, DBMS, Automata & Formal Languages, Assembly (8086), Networking

AI-Driven Full-Stack Web Engineering — Ongoing
Programming Hero

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3, Assembly 8086, LaTeX
Frontend	React.js, Next.js (App Router), Tailwind CSS v4, shadcn/ui, Framer Motion, Responsive & Mobile-first Design, SEO
Backend	Node.js, Express.js, FastAPI, REST APIs, JWT/Cookie Authentication, Better Auth, Security Basics
Databases	MongoDB, Mongoose, PostgreSQL, Prisma ORM, Schema Design
DevOps & Tools	Git & GitHub, GitHub Actions (CI/CD), Vercel, Netlify, Render, Figma
AI Tools	GitHub Copilot, Cursor IDE, ChatGPT, Google Gemini (AI-assisted refactoring and debugging)

PROJECTS

BookNook - Community Library Platform — Next.js, Better Auth, MongoDB

- Built a full-stack library web app with Next.js App Router, React, TypeScript, Tailwind CSS, and Better Auth.
- Implemented book catalog discovery with availability tracking, personal collection management, and borrow/return workflows.
- Designed a companion Express & MongoDB REST API with secure authentication and structured error handling.
- Live: borrowbook-client.vercel.app

E-commerce Platform — MERN, JWT, Stripe-ready

- Built a full MERN application with user authentication, shopping cart and checkout flow.
- Designed a secure REST API with JWT-based auth and structured error handling.

SaaS Dashboard — Next.js, Prisma, PostgreSQL

- Developed a server-side rendered dashboard with a relational PostgreSQL schema via Prisma ORM.
- Used TypeScript end to end for type-safe data flow between UI and API.

PROJECTS (CONTINUED)

Wanderlust - Travel Destination Explorer Next.js 16, React 19, shadcn/ui, MongoDB

- Developed a modern travel platform with destination browsing, interactive booking reservations, and custom publishing.
- Used Next.js 16 App Router with React 19, Tailwind CSS v4, and shadcn/ui component library.
- Integrated Better Auth with MongoDB for persistent user sessions and profile management.

Bazar Dor - Market Price Tracker Next.js, TypeScript, MongoDB

- Created a Bengali-language web app tracking daily market prices of essential commodities across Bangladesh.
- Implemented real-time price trend visualization, category filtering, per-market comparisons, and user sign-in.
- Live: bazar-dor-three.vercel.app

Fit Log - Fitness Workout App Next.js, TypeScript, Tailwind

- Built a responsive fitness app with dynamic workout library, personalized plans, and completion tracking.
- Implemented workout statistics, sorting, toast notifications, and persistent client-side state.
- Live: fit-log-sandy.vercel.app

Blog Application React, Node.js, MongoDB

- Created a blog backend and responsive React UI with CRUD and MongoDB document modeling.
- Accelerated development and debugging with an AI-assisted workflow.

Personal Portfolio - Responsive Developer Website HTML, CSS, JavaScript

- Built a responsive portfolio website to present projects, technical skills, and contact information.
- Added accessible dark and light themes with saved visitor preference and system theme support.

STRENGTHS

- **Full-stack integration:** reactive UIs connected to well-structured REST/FastAPI endpoints.
- **Fast learner:** learns by building and finishes what I start.
- **Teamwork:** asks questions, welcomes feedback, communicates clearly.
- **AI-augmented workflow:** uses Copilot, Cursor, and ChatGPT to accelerate development without losing understanding.
